

Serverless

- **Serverless Overview:**
 - No infrastructure management.
 - Auto-scaling, event-driven execution.
 - **Serverless on Kubernetes:**
 - Use tools like **Knative**, **Fission**.
 - Event-driven, auto-scaling on Kubernetes.
 - **Knative:**
 - Extends Kubernetes for serverless workloads.
 - Auto-scaling, routing, event-driven.
 - **Fission:**
 - Serverless framework for Kubernetes.
 - Functions-as-a-service (FaaS).
 - **Benefits:**
 - Focus on code, not infrastructure.
 - Dynamic scaling based on demand.
